HARBOUR NET NEWS

Welcome The Harbour Net Newsletter is here to keep you up to date on how the project is going. What we would like to do is have a quarterly report from someone at each associated harbour so that we can share this information and help each other.

The report could include recent successes at your harbour, problems you are facing and plans for the near future. Forthcoming events and special occasions (AGMs etc.) could be given free publicity in the newsletter.

We would also like to know what you want us to include so that we can make this a really useful and informative newsletter.

Here's hoping that Harbour Net proves to be a useful and helpful source of contact and information for all its members.

Please feel free to contact me for any information or to share with other Harbour Net members.
