

## Findochty PS 26 June 2006

This School visit involved P6's from two classes. This school had already located a suitable beach to take our Beach Guardian Toni along to - Sunny Craigs. This is a sandy beach to the east of the Lossiemouth. Toni spent about 10-15 mins with the pupils at the school advising them about what it was safe to pick up and providing them with their litter pickers before heading out to the beach.

The group walked to the first beach where there wasn't very much to collect so then went west to another beach just below the public toilets by the entrance to the caravan site where there was quite a bit more litter to be collected- mainly plastic bottle and metal.

The evaluation sheets were left at the school to be completed later the following week, prizes were also left for the best pledges. This school is already environmentally aware and is at Silver level in the Eco-schools programme.

Sunny Craigs Beach living up to its name.
