

## Our Vision

to be the most sustainable marine region  
in Scotland by 2030

[www.morayfirth-partnership.org](http://www.morayfirth-partnership.org)

The Moray Firth Coastal Partnership plays a unique role as a neutral, independent charity in promoting and facilitating sustainable solutions to the marine and coastal challenges faced by the Moray Firth and its communities.

We are involved with a wide variety of issues, projects, and stakeholders. Our unique overview of the Moray Firth, its communities and businesses, allows us the privilege to work with a great range of people and ideas.

For membership and general enquiries:

## Our Role

We bring together a wide range of interested parties to increase our shared understanding, encourage joint working, and facilitate the development of long-term sustainable solutions.

## Working for a sustainable future for the Moray Firth and its communities

The **Vision Statement** is the basis for a forward work management programme for the MFCP and its many future partners.

It focuses on the main, identifiable challenges and opportunities currently facing the Firth, and is open to amendment as circumstances and knowledge develop. [We welcome your views at any time.](#)
